PRODUCT DESCRIPTION

Plamen is one of only a few fireplace manufacturers globally that **operates its own cast iron foundry**. This gives the company complete control over the quality of the cast iron used in every fireplace, ensuring **exceptional strength, durability, and performance**. With more than **100 years of foundry expertise**, Plamen has developed unrivalled knowledge in the design and manufacture of premium cast iron wood-burning fireplaces.

Plamen stoves offer **excellent radiant heating** for your home, even long after the last log of wood has been added. Being efficient, closed-combustion fireplaces, the majority of the heat is released into the room.

With very **impressive efficiency ratings**, these wood-burning fireplaces offer a highly effective, yet economical heating solution. With **great attention to detail given to the design and quality of each stove**, a Plamen fireplace is an eye-catching addition to your home.

Plamen fireplaces are designed with a **permanent secondary air intake** at the top of the glass door. This system is used by manufacturers of cast iron fireplaces that want their premium fireplaces to last long term. By maintaining continuous secondary airflow, the fire remains steady even when the main air controls are fully closed – ensuring a consistent, efficient burn within the chamber. This system significantly **reduces temperature fluctuations of the metals to protect the cast iron body for an extended lifespan**. It also helps keep the fireplace glass clean and reduces soot build-up within the flue system.

To improve the safety, performance and lifespan of the fireplaces, Plamen uses **high quality, heat-resistant glass**. Thanks to the specialised, air-wash glass cleaning system, the soot deposits on the glass door are greatly reduced.

The **removable (slide-out) ash box** is a good size and allows for simple and easy cleaning.

Each fireplace comes standard with a heat protective glove and wood stoker.

With **over 100 years' experience in producing quality cast iron products**, Plamen offer South African's great value from a **trusted European manufacturer.**

ADDITIONAL INFORMATION

Weight	118 kg
Dimensions	45 × 40 × 100.1 cm
Material	Cast iron
Heat output	8 – 11 kw
Efficiency	82%
Energy rating	A+
CO emissions	0.08%
Combustion technology	Primary, secondary & tertiary combustion
Colour	Black
Fuel	Wood
Flue pipe diameter	150 mm
Flue exit	Top
Ash pan	Slide out tray
Warranty	2-year warranty
Country of manufacture	Croatia

NOTES
